routine. By the time the Senate adjourns there will be nothing to show that the

office-seeker has of late been so rampant in the land. The fight so far has been for

the big places, and as the appointments are announced the chances of those who

are after them grow smaller and beautifully less, and the demand for the smaller

places will begin shortly in earnest. Here-tofore the original Cleveland man and the party worker has been after the foreign

missions, the consulships or the head of some bureau. Soon he will take what he can get, and be thankful, too.

It is said that Mr. Cleveland's policy in the matter of appointments has been to a great extent to pick up some man who has not been an applicant for the place, but of whose abilities he has heard in some round-about way when he was listening to the tale of some other.

officesceker. This is said to have been the case when Mr. Maxwell was made Solicitor-General. Mr. Maxwell's partner

was being urged for some other place, and Mr. Maxwell's name was thus indirectly brought to the President's attention. Mr. Cleveland in an almiess kind of a way began to put himself in possessed by Mr. Maxwell. The result was the unexpected reception, by him.

> OLD POINT COMFORT, VA., April 11. Special .- At 10 o'clock this morning the White squadron filed out to sea, with many a fantastic twist and turn between here and the capes. A four days' drill is ordered to insure a perfect review. About two miles out the fleet met the Bancroft steaming into the Roads, so that only the Philadelphia, Admiral Gherardi's flag ship, and the last comer remain to receive other vessels.

Every young girl who meets the naval officers wears the band of her favorite ship on her hat. The names of the Russian vessels are sometimes put on side down, but no one seems to realize

the difference.

It is a source of great disappointment to the army officers that an appropriation was not given them for the entertainment of the loreign officers. They have very pretty club-rooms, but thus far they have dined and wined visitors

A middle-aged bachelor who visits the Hygela every spring is again noticed among the throng. As he is a lover of pretty girls and has a cool million of dollars at his call he is very much petted. As he is connected with a well-known children's periodical, he goes by the name of "The Youth's Companion."

John Habberton, of "Helen's Bables" fame, is a trim, natty-looking young man, rather handsome. Dozens of children are playing on the beach, rosy-checked, plump and happy, and he has an admiring look for each one. The new hand-shake is proving most

distressing, as there are as many varie-ties of shake as there are languages spoken. While a common language has been invented, a common method of shaking hands has become an absolute

DEMOCRATS AND REPUBLICANS LOCK HORNS ON THE CASE.

The Question as to Whether the Inquiry Shall be Gone Into Discussed in Executive Session.

WASHINGTON, D. C., April 11.-The

Roach case came prominently to the front to-day in executive session of the Senate, and was the cause for some rather plain talk from both sides of the chamber. The Senate only went into secret session after a yea and nay vote, in which it was developed that the Democrats had enough members present, added to the Republicans, to make a voting quorum. As soon as the doors were closed the Republicans propounded an inquiry as to what the other side meant by refusing to permit the Committee on Privileges and Elections to report the resolution relative to the contest of Mr. Martin's seat by Mr. Ady, a resolution that had been agreed upon in the committee at the meeting Saturday; and, further, why they had exhibited what appeared to be bad faith in the Roach resolution, a resolution which the Repub licans contended had been agreed to by the Democrats on the floor of the Senate This at once precipitated a discussion in which it was developed that the Democrats were opposed to taking up the Roach case at this time, and wanted to postpone any further action until the next session of Congress. It was declared by Democratic leaders, as had been stated by them before, that if the Roach case was to be gone into there were others that should be taken up as well. The Republicans retorted that they were afraid of no investigation concern-ing of any of their members, but they in-sisted that some positive action should be taken in this particular case. The Democrats said they were willing the resolution should be modified so as to instruct the committee to report whether or not they had the authority to make the investgation concerning the previous acts of a Senator; but the Republicans urged that this did not go far enough and insisted that the committee should still further authorized to go ahea and make the investigation if they found they had such authority. It was this counter proposition that the Democrats opposed, and after a long discussion of the two views so vehemently adhered to by the respective sides the question

was laid aside without any definite ac-The Martin case was given its share of the debate, the Republicans contending that the Committee on Privileges and Elections should report the resolution as adopted at its meeting, and that the work contemplated under the resolution should be presecuted during the recess of the Senate. From the debate that ensued Republicans assert that they draw the conclusion that the Democrats do not intend to do anything in this case, and will, if possible, refuse to look into the question of the legality of the seat

Mr. Browning is said to have made a strong effort to secure the position of commissioner of the land office.

The selection of Judge Browning as The relection of Judge Browning as commissioner of Indian affairs completes the list of appointments of the heads of the four great bureaus of the Interior Department. In that capacity he made a reputation as one of the best officers in the inspec-tion service. Probably because of that tion service.
